REASONS FOR ALLOWANCE

1. Claims 1, 4-12, 33-35 and 41-55 are allowed.
2. The amendments to the claims and specification overcome the 35 U.S.C. 101 rejections of claims 42-55.
3. The following is an examiner's statement of reasons for allowance: The claimed invention describes mapping an XML document to a relational database. The prior art Manning fails to teach or suggest using a mapping scheme to perform a single transformation that moves an XML document directly into a relational database without materializing or creating any stored representation. Manning does not create a mapping based on user commands instead it reads a pre-defined schema or DTD, this prevents the user from customizing mappings to a table. Manning actually stores the xml elements after accessing the document because it involves a parser which creates a representation of the entire document. The claimed mapping itself does not create a stored representation of the entire XML document. Instead the invention provides a simplified manner of mapping data without creating a stored representation such as a DOM or without requiring additional steps for multiple transformations of data. The invention describes processing each element one at a time directly into the locations of the relational database thereby increasing the speed of mapping data and also conserving memory.
4. Furthermore, the claimed feature would not have been obvious to a person of ordinary skill in the art at the time of the invention in view of the prior art of record. Because Manning fails to teach the features recited in the independent claims has described above. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee

and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on "Statements of Reasons for Allowance".
